Quartz Transverse Measuring Pin

for Indirect Force Measurement in Maschines and Tools

Piezoelectric sensor for indirect force measurement in machine structures, tools, etc. in industrial monitoring tasks.

- Preloading allows measuring compression and tension forces
- Can be fixed in any direction and depth in the mounting bore
- Ground-isolated

Description

The front part of the sensor is sensitive to transversal forces. Shaped as a cylindrical pin, all it needs for its installation is a 10 mm borehole. An integrated clamping system is used to preload the sensor in the borehole enabling it to detect tensile and compressive forces in the machine structure. The ceramiccoated body sleeve allows to mount the sensor ground insulated.

Application

The sensor is easily mountable and allows to measure forces within a machine part or a tool.

Once installed, the sensor can be calibrated by comparative measurement, e.g. with a calibrating force sensor.

The main application field is the industrial monitoring of machine forces (machine monitoring, tool monitoring, etc.).

In combination with a ControlMonitor (CoMo[®]) it can be used to monitor limit values of forces that are decisive in the safety and reliability of machines and tools.

Technical Data

Range		
with preload 750 N	με	0 500
with preload 1 250 N	με	-150 350
with preload 1 750 N	με	-300 200
Overload		
with preload 750 N	με	850
with preload 1 250 N	με	700
with preload 1 750 N	με	550
Threshold in test object	με	0,005
Sensitivity in test object	ρC/με	≈–15
Force sensitivity for preload	pC/N	≈–4
Linearity	% FSO	≤±1
Hysteresis	% FSO	≤1,5
Repeatability of sensitivity	%	±2
after demounting and remounting		
Acceleration sensitivity	με/g	≤0,1
(measuring direction)		
Operating temperature range	°C	-40 200
Insulation resistance at 20 °C	Ω	≥10 ¹³
Ground insulation	Ω	≥10 ⁸
Capacitance	pF	322
Protection class		IP 64
Weight	g	38

1 $\mu \epsilon$ = 1 microstrain = 10⁻⁶ m/m;

1 N (Newton) = 1 kg·m·s⁻² = 0,1019... kp = 0,2248... lbf,

1 kp = 1 kgf = 9,80665 N

Mounting

By adjusting the nut the sensor is preloaded using a charge amplifier and a display unit.

The mounting tool Type 1393B... is used for deep hole mounting.
